Versatile and self-taught IT Support Technician & Full-Stack Developer with **5+ years** of hands-on experience in hardware maintenance and technical support. Spent **7 months** working with a full development team to build a large-scale application, contributing across frontend (React), backend (Node.js/Express), and database (MySQL) layers, alongside project coordination. Strong command of Linux, Git, algorithms, and software engineering fundamentals.

PROFESSIONAL EXPERIENCE

Full-Stack Developer & Project Coordinator

HealthMap | Full-Stack Developer & Project Coordinator | 7-Month Collaboration

- Collaborated with a development team to design and build a large-scale application from concept to deployment.
- Led and contributed to frontend development using React and modern JavaScript tooling.
- Built backend services and REST APIs with Node.js and Express.
- Designed and managed relational databases using MySQL.
- Took on project coordination alongside technical roles (frontend, backend, DB).
- Managed source control and collaboration workflows using Git and GitHub.

Freelance IT Support Technician

Self-Employed | 2020–Present

- Assembled, configured, and upgraded desktop and laptop computers with full hardware knowledge (CPU, GPU, RAM, SSD, HDD, PSU, Motherboard, Cooling systems, Power supply)
- Installed and configured Windows 10/11 and Linux operating systems from scratch.
- Diagnosed and resolved hardware and software issues for home and business clients.
- Removed malware, optimized system performance, and provided preventive maintenance.
- Delivered remote and on-site technical support with consistent customer satisfaction.

PROJECTS

Software Engineering Foundation

Self-study of the C programming language covering memory management, pointers, and low-level concepts. Practiced algorithms and problem-solving to strengthen engineering fundamentals.

Computer Maintenance & Repair

Diagnosed and repaired multiple desktop and laptop systems. Replaced defective components, reinstalled operating systems, and recovered data.

Local Network Setup

Configured routers and switches, connected multiple devices, and resolved internet and connectivity issues for small home/office environments.

Automated Technical Tasks

Created scripts and automation tools to reduce time spent on repetitive IT maintenance tasks.

EDUCATION

OFPPT Diploma – Industrial Electricity Maintenance	2024
OFPPT Certificate – Entrepreneurial Innovation	2024
Web Development Certificate	2025

TECHNICAL SKILLS

Operating Systems

Windows 10 / 11, Ubuntu, Debian, Kali Linux

Hardware & Maintenance

PC assembly & upgrades, hardware diagnostics, component replacement (RAM, SSD, HDD, PSU), preventive maintenance

Software & Sysadmin

OS installation & config, driver deployment, system optimization, MS Office, user account setup

Networking

IP addressing, DNS, DHCP, routers & switches basics, internet troubleshooting

Dev Tools

Git, GitHub, VS Code, Eclipse, XAMPP, Postman, phpMyAdmin, FileZilla, Remote Desktop, TeamViewer, VirtualBox, Linux Terminal.

Development Stack

React, Node.js, Express, MySQL, HTML / CSS / JavaScript, Python basics, WordPress
